

Henry Tan

Software Engineer

(347) 653-2393 New York, NY htan0705@gmail.com [PORTFOLIO](#) [GITHUB](#) [LINKEDIN](#) [WELLFOUND](#)

SKILLS

LANGUAGES: JavaScript, TypeScript, Python, PHP, Go, Python, SQL, HTML5, CSS3, HubL

TECHNOLOGIES: React, Redux, Node, Express, Flask, Ruby on Rails, HubSpot, Git, AWS, Expression Engine, Chrome Extensions

EXPERIENCE

[Black Spectacles](#)

Software Engineer (React, TypeScript, Node.js, Material UI, HubSpot, MySQL)

May 2022 - July 2024

- Led the migration from Expression Engine PHP to React/TypeScript, redefining frontend architecture and core feature development.
- Built a self-serve checkout portal using React, TypeScript, and Material UI, replacing legacy systems for improved usability.
- Developed reusable marketing website components with HubSpot, HubL, JavaScript, HTML, and CSS for consistent branding.
- Created internal admin tools, including a custom text editor for email templates, with backend SQL updates in MySQL.

Stealth Startup (Digital Health Industry)

Software Engineer (Chrome Extensions, React, JavaScript, Node.js, Material UI, Python, Flask)

Dec 2020 - May 2022

- Developed the company's primary product, a Chrome extension, using React and Material UI to deliver a responsive, intuitive interface.
- Integrated Contentful CMS for streamlined content management, enabling non-technical users to publish updates autonomously.
- Designed state management with Context API for modular architecture, reducing prop drilling and improving performance.
- Implemented Chrome Extension Storage API for efficient data caching and persistence, minimizing API requests and optimizing performance.

PROJECTS

Henflix (React, Redux, Ruby on Rails, and PostgreSQL)

[live](#) | [github](#)

A bird-themed Netflix clone, a media streaming platform allowing users to sign up to stream TV shows and movies

- Implemented user authentication with BCrypt hashing and model/controller-level validation, securing user data and restricting video access to authorized users.
- Optimized video fetching by eager-loading AWS attachments and related content via Rails associations, reducing database query times and eliminating N+1 queries for a faster user experience.
- Engineered an asynchronous data flow using Redux to dynamically fetch and display videos and genres, ensuring seamless filtering, formatting, and uninterrupted video presentation.

Nutrify (Javascript, Chart.js, and D3.js)

[live](#) | [github](#)

A nutritional breakdown data visualization app that converts user input into nutritional data, rendered in a donut chart and liquid fill gauges

- Filtered and formatted API data into specific nutritional categories, utilizing Chart.js to visualize overall nutritional values in an intuitive donut chart for easy user interpretation.
- Restructured nutritional data into multiple liquid fill gauges using SVG elements, providing a clear and engaging view of the percentage of FDA-recommended daily intake based on ingredient values.

EDUCATION

Web Development - App Academy

2019

12-week, rigorous 1000 hour full-stack programming bootcamp with less than 3% acceptance rate.

Computer Science - Hunter College

Attended 2014 - 2018
